

**FROM:** Communicable Disease Prevention Unit  
San Francisco Department of Public Health

**DATE:** October 24, 2011

**Please Read and Post**

### **THANK YOU!**

You did it!! As a result of your hard work and dedication, an estimated 35,000 adolescents in San Francisco have been vaccinated with Tdap in response to AB354. This was a huge and unprecedented undertaking. Congratulations to everyone on your team – on OUR team!

**REMEMBER!** Next year, and every school year thereafter, all 7<sup>th</sup> grade students will need to show proof of Tdap vaccination. Let's keep the momentum going strong by following these 3 simple steps:

- ✓ Immunize your patients with Tdap at every opportunity
- ✓ Bring in your 11-12 year olds for the adolescent well-child check up. Make sure your office is well stocked with all necessary vaccines (Tdap, Meningococcal, Varicella dose 2, HPV, and Influenza)
- ✓ Provide clear documentation of Tdap immunization for your patients to bring to school

Please visit [www.shotsforschool.org](http://www.shotsforschool.org) for resources and tools or call 415-554-2830 with questions.
