

Using Shared Laundry Facilities During the COVID-19 Pandemic

National Collaborating Centre
for Environmental Health
Centre de collaboration nationale
en santé environnementale

Current research suggests that SARS-CoV-2, the virus that causes COVID-19 may survive on hard surfaces, so laundry machines, countertops, and furniture need to be sanitized frequently. SFPDH has guidance on disinfectants and how to use them safely at: www.sfcdcp.org/covidcleaning

Shared Laundry Facility employees are recommended to wear disposable gloves when handling dirty laundry. Although laundry from sick people should be kept bagged and separate while in your home to prevent accidental handling, there is no need to wash or dry these items separately.

DO'S

DONT'S

Wash your hands before and after.

DON'T shake dirty laundry before putting it in the machine.

Wipe down controls, and handles before and after use.

Dry items at highest temperature possible and dry them completely.

DON'T leave soiled clothing or baskets on top of machines or tables.

Wash with soap and the warmest water possible. Do not overload the machine.

Keep a 2 m distance from others.

DON'T leave cleaning residues (like bleach) that could damage other people's clothing.

Disinfect your hamper before filling it with clean clothes.

DON'T leave dryer door open when not in use.

DON'T forget to wash your hands!
