Using Shared Laundry Facilities
During the COVID-19 Pandemic

Current research suggests that SARS-CoV-2, the virus that causes COVID-19 may survive on hard surfaces, so laundry machines, countertops, and furniture need to be sanitized frequently. SF DPH has guidance on disinfectants and how to use them safely which can be found at https://tinyurl.com/sfdph-covid19-disinfectants. Shared Laundry Facility employees are recommended to wear disposable gloves when handling dirty laundry.

Although laundry from sick people should be kept bagged and separate while in your home to prevent accidental handling, there is no need to wash or dry these items separately.

**DO’S**

- Wash your hands before and after.
- Wipe down controls, and handles before and after use.
- Wash with soap and the warmest water possible. Do not overload the machine.
- Dry items at highest temperature possible and dry them completely.
- Disinfect your hamper before filling it with clean clothes.
- Keep a 6 ft distance from others.
- Wash your hands before and after.

**DON'T'S**

- DON'T shake dirty laundry before putting it in the machine.
- DON'T leave soiled clothing or baskets on top of machines or tables.
- DON'T leave cleaning residues (like bleach) that could damage other people’s clothing.
- DON'T leave dryer door open when not in use.
- DON'T forget to wash your hands!
